INDEX

ABSTRACTS of papers presented at the Marine Biological Laboratory, 277.
Acrosome, reaction of to egg-water and other stimuli, 54.
ACTH, effect of on cleavage pattern of Arbacia ova, 305.
Action of DNase on cell nuclei, 319.
Activation of Nereis eggs by surface active extract of dead sperm, 305.
Adaptation to chemical stimulation of the tarsal receptors of the blowfly, 178.
Agglutination of fish erythrocytes by normal human sera, 328.
Aggregation stage in development of slime molds, analysis of, 259.
Aggregative center formation by mixtures of wild and aggregateless slime molds, 446.
Alcohol, ethyl, effects of on growth and respiration in Pelomyxa, 97.
ALFERT, MAX. Studies on basophilia of nucleic acids: The methyl green stainability of nucleic acids, 145.
Algae, flagella of, 74.
Alkaline sea water, reaction of acrosome to, 54.
Alkyl amines, halogenated, effects of on sea urchin egg division, 44.
ALLEE, W. C., and J. C. DICKINSON, JR. A contribution toward a knowledge of dominance in the smooth dogfish, Mustelus canis (Mitchill), 290.
ALLEN, ROBERT DAY. A visible response to stimulation in Spisula eggs, 283.
ALLEN, ROBERT DAY. The behavior of Spisula eggs with respect to potassium ions, 290.
Amaroecium, developmental history of, 226.
Ambystoma, methyl green stainability of nucleic acids in tissues of, 145.
Ameba, effects of ethyl alcohol on growth and respiration in, 97.
Amphibian gastrula explants, respiratory metabolism of, 407.
Analysis of the aggregation stage in the development of the slime molds, Dictyosteliaceae I. The populational distribution of the capacity to initiate aggregation, 259.
Analysis of aggregation stage in development of slime molds. II. Aggregative center formation by wild-type and aggregateless D. discoideum, 446.
ANDRUS, WILLIAM D. *See* GEORGE T. SCOTT, 308.
Antennal cuticle of honeybees, studies on, 201.
Annual Report of the Marine Biological Laboratory, 1.
Antigens, erythrocyte, of fish, 328.
Application of the most probable number method to determine heat sensitivity of protozoa, 364.
Arbacia, effects of halogenated alkyl amines on division of eggs of, 44.
Arbacia, electrical method for "sexing," 284.
ARMSTRONG, PHILIP B. Comparison of dye elimination in the developing liver and kidney (pronephros), 289.
ARMSTRONG, PHILIP B., and D. R. SHANKLIN. Facilitation of hydrogen ion passage across the chorion of Fundulus by the chlorides of calcium, potassium and sodium, 291.
ARMSTRONG, PHILIP B. *See* D. R. SHANKLIN, 295.
Arthropod muscle fibers, effects of calcium ion on, 421.
Arthropods, studies on cuticle of, 201.
Astacuran Crustacea, serological comparisons of, 433.
Atlantic Coast turbellarian fauna, notes on, 195.

BACILA, METRY, and R. R. RONKIN. On the presence of lactose in the hypobranchial gland of the snail, Busycon canaliculatum (L.), 296.
Bacillus subtilis, studies on poly-D-glutamic acid of, 291.
Balantidial infection in tadpoles as recorded by cinephotomicrography, 285.
BALL, E. G. *See* C. F. STRITTMATTER, 317.
BARTON, JAY, II. The action of DNase on cell nuclei, 319.
BARTON, JAY, II. Nucleoprotein complexes of sperm nuclei, 314.
Basophilia of nucleic acids, 145.
Bermudan Crustacea, bleeding and coagulation in, 395.
BERNSTEIN, G. S. Sperm agglutinins in the egg jelly of the frogs Rana pipiens Schreber and R. clamitans Latreille, 285.
Bleeding and coagulation in some Bermudan Crustacea, 395.
BLISS, DOROTHY E., and JOHN H. WELSH. The neurosecretory system of brachyuran Crustacea, 157.

Blood coagulation in certain decapod Crustacea, 316.
Blowfly, adaptation of tarsal receptors of to chemical stimulation, 178.
Boyce, Steve G. An ecological study of coastal plants on Cape Cod, 296.
Boyer, P. D. Studies on the distribution, potassium activation and mechanism of pyruvic phosphoferase, 314.
Brachyuran Crustacea, neurosecretory system of, 157.
Brain and prothoracic glands as endocrine system in the Cecropia silkworm, 120.
Brandt, C. L. *See* A. C. Giese, 336.
Brown, Frank A., Jr., Muriel I. Sandeen and Milton Fingerman. Modification of the tidal rhythm of Uca by tidal difference and by illumination, 297.
Brown, Frank A., Jr., H. Marguerite Webb and Robert C. Graves. A persistent tidal rhythm in the fiddler crab, Uca pugnax, 297.
Brown, Frank A., Jr. *See* H. Marguerite Webb, 310; Muriel I. Sandeen, 307.
Bugula, factors influencing metamorphosis of larvae of, 369.
Butros, Joseph M. On the relationship between cleavage block by respiratory inhibitors and viscosity changes in Ilyanassa eggs, 297.

CA–45, use of in measurement of rate of shell formation, 269.
Calcium ion, effect of on metamorphosis of Bugula larvae, 369.
Calcium, effects of on isolated arthropod muscle fibers, 421.
Callinectes sapidus, effects of calcium on isolated muscle fibers of, 421.
Cambarus, control of cement gland development in, 242.
Cancerous mice, attempt to influence survival time of, 282.
Carbohydrate metabolism, oxidative pathway of in E. coli, 287.
Cecropia silkworm, brain and prothoracic glands as endocrine system in, 120.
Cement gland development in the crayfish, 242.
Chaet, Alfred B. The action of heparin preparations on cells and tissues, 281.
Chaet, A. B. *See* L. V. Heilbrunn, 303.
Chaetopterus pergamentaceus, protoplasmic cortex of in relation to stimulation, 139.
Chemical stimulation, adaptation to of tarsal receptors of blowfly, 178.
Chlamydomonas, studies on flagella of, 74.
Chorion, Fundulus, osmotic behavior and anatomy of, 295.
Ciereszko, Leon S. Studies on the nonsaponifiable fraction of lipid material from marine animals II., 315.
Ciereszko, Leon S., and Charles R. Crane, Jr. Studies on the poly-D-glutamic acid of Bacillus subtilis NRRL-571, 296.
Ciona intestinalis, relation between water transport and food requirements of, 356.
Clark, A. M., and C. J. Mitchell. Effects of x-rays upon haploid and diploid embryos of Habrobracon, 170.
Cleavage block and viscosity changes in Ilyanassa eggs, 297.
Cleavage, effects of halogenated alkyl amines on, in sea urchin eggs, 44.
Cleavage initiation in frog eggs, 282.
Cleavage in marine eggs, initiation of by various agents, 139.
Cleavage synchrony in Arbacia, 288.
Coagulation and bleeding in Bermudan Crustacea, 395.
Cockroach, structure of peritrophic membrane of, 384.
Colchicine, effect of on melanophoral activity in excised frog skin, 312.
Cold, effect of on protoplasmic cortex rigidity, 139.
Colloidal changes in sea urchin egg homogenates, 293.
Colpidium colpoda, photoreactivation in, 336.
Comparative serology of astacuran Crustacea, 433.
Connelly, C. M. The oxygen consumption of squid nerve, 315.
Control of cement gland development in the crayfish, 242.
Cooper, O. *See* C. F. Strittmatter, 317.
Cornman, Ivor, and Margaret Evans Cornman. The effects of different halogenated alkyl amines on the division of sea urchin eggs, 44.
Cornman, Ivor, and Edward F. Rogers. Chemical characteristics of rotenone antagonists as determined by effects on dividing sea urchin eggs, 298.
Cortex, protoplasmic, in relation to stimulation, 139.
Costello, Donald P., Catherine Henley and Donald E. Kent. Effect of P-32 on mitosis in Chaetopterus eggs, 298.
Couillard, Pierre. The fertilization inhibitor in the blood cells of Arbacia, 299.
Crab, effects of calcium on isolated muscle fibers of, 421.
Crago, response of distal retinal pigment of to changes in illumination, 307.
Crane, Charles R., Jr. *See* Leon S. Ciereszko, 291.

Crassostrea virginica, measurement of rate of shell formation of, 269.
Crassostrea virginica, temperature requirements for maturation of gonads of, 80.
Crayfish, control of cement gland development in, 242.
Crayfish, serological comparisons of, 433.
Crustacea, astacuran, serological comparisons of, 433.
Crustacea, bleeding and coagulation, in, 395.
Crustacea, brachyuran, neurosecretory system of, 157.
CURRIER, JOANNE E. *See* MADELENE E. PIERCE, 306.
CUSHING, JOHN E., and LUCIAN SPRAGUE. The agglutination of fish erythrocytes by normal human sera, 328.
Cuticle, arthropod, studies on, 201.
Cymatogaster, agglutination of erythrocytes of by normal human sera, 328.
Cytochemistry of DNase, 319.

DAN, J. C. Studies on the acrosome. I. Reaction to egg-water and other stimuli, 54.
DAN, KATSUMA, SUSUMU ITO and DANIEL MAZIA. Study of the course of formation of the mitotic apparatus in Arbacia and Mactra by isolation techniques, 292.
DAN, KATSUMA. *See* D. MAZIA, 283.
Dark period, significance of in photoperiodic response of male birds, 345.
DAVIS, H. C. *See* V. L. LOOSANOFF, 80.
DAY, M. F. *See* E. H. MERCER, 384.
Desoxyribonucleic acid in nuclei of Arbacia eggs, 295.
Desoxyribonucleic acid in Arbacia eggs determined by isotope dilution, 294.
DETHIER, V. G. Adaptation to chemical stimulation of the tarsal receptors of the blowfly, 178.
Development of Cecropia silkworm adult as function of brain and prothoracic gland regulation, 120.
Development of cement gland in crayfish, 242.
Development of slime molds, analysis of aggregation stage in. I., 259.
Development of slime molds, analysis of aggregation stage in. II., 446.
Developmental history of Amaroecium constellatum. III. Metamorphosis, 226.
Diapause, brain and prothoracic glands as endocrine system in, 120.
DICKINSON, J. C., JR. *See* W. C. ALLEE, 290.
Dictyosteliaceae, analysis of aggregation stage in development of, 259.
Dictyostelium discoideum, aggregative center formation by mixtures of wild and aggregateless, 446.
Diploid Habrobracon embryos, effect of x-rays on, 170.
DI STEFANO, HENRY, and DANIEL MAZIA. The role of the midpiece in the incorporation of P-32 into the ribonucleic acid of Arbacia spermatozoa, 299.
DNase, action of on cell nuclei, 319.
Drosophila, influence of temperature on synapsis in hybrid salivary glands of, 67.
DUNN, ARNOLD. *See* L. V. HEILBRUNN, 33.
Dye elimination in developing liver and kidney, 289.

ECOLOGICAL study of coastal plants on Cape Cod, 296.
Effects of calcium on isolated arthropod muscle fibers, 421.
Effects of different halogenated alkyl amines on sea urchin egg division, 44.
Effects of ethyl alcohol on growth and respiration in Pelomyxa, 97.
Effects of x-rays upon haploid and diploid embryos of Habrobracon, 170.
Egg inclusions, electron microscopy of, 294.
Egg, protoplasmic cortex of in relation to stimulation, 139.
Egg surfaces, electron microscopy of, 293.
Egg-water, reaction of acrosome to, 54.
Eggs, effect of halogenated alkyl amines on division of, 44.

PITELKA, DOROTHY, and CHARLES B. METZ. The structure of the "neuromotor apparatus" of Paramecium as revealed by the electron microscope, 282.
Pituitary posterior lobe preparations, influence of on action of phenolases in vitro, 304.
Platysamia cecropia, brain and prothoracic glands as an endocrine system in, 120.
Ploidy, relation of to x-ray damage in Habrobracon embryos, 170.
Populational distribution of capacity to initiate aggregation in slime molds, 259.
Potassium exchange in Ulva, 308.
Potassium ion, effect of on metamorphosis of Bugula larvae, 369.
Potassium ions and Spisula eggs, 290.
Predation experiments using P-32 as "tag" for Paramecium, 190.
PROCTOR, NATHANIEL K. The effects of calcium on isolated arthropod muscle fibers, 421.
Prosthetic groups of cytochrome oxidase and cytochrome b, separation and partial identification of, 287.
Protein structure, bearing of new results in on cytological interpretations, 313.
Prothoracic glands and brain as endocrine system in Cecropia silkworm, 120.
Protoplasmic cortex in relation to stimulation, 139.
Protozoa, use of most probable number method to determine heat sensitivity of, 364.
PRYOR, CARLON W., and CHARLES A. LEONE. Serological comparisons of astacuran Crustacea, 433.
Pseudocentrotus, reaction of sperm acrosome of to egg-water and other stimuli, 54.
Pyruvic phosphoferase, studies on distribution, potassium activation and mechanism of, 314.

RADIOCALCIUM, use of in measurement of rate of shell formation, 269.
Radiophosphate, uptake of in Paramecium, 190.
Radiosensitivity of diploid and daploid Habrobracon embryos, 170.

Rana pipiens embryos, respiratory metabolism of, 407.
Rate of shell formation, measurement of using Ca-45, 269.
Receptors, tarsal, adaptation of to chemical stimulation in blowfly, 178.
Regulation of spontaneous structural anomalies in Pelmatohydra, 104.
Relation between water transport and food requirements in some marine filter feeding invertebrates, 356.
Reproductive rate of algae after treatment with growth-affecting substances, 304.
Respiration, effects of ethyl alcohol on, in Pelomyxa, 97.
Respiratory inhibitors, effect of on melanophoral activity of frog skin in vitro, 311.
Respiratory metabolism of amphibian gastrula explants, 407.
Reversible contraction of protoplasmic structures by changes in pH values, 306.
Ribonucleases of liver and kidney, comparative study of, 288.
RICHARDS, A. GLENN. Studies on arthropod cuticle. VIII. The antennal cuticle of honeybees with particular reference to the sense plates, 201.
Rigidity of protoplasmic cortex, effect of various agents on, 139.
